

# UCSF Medical Center at Mount Zion - Smoke Free Zone

## Welcome to the University of California, San Francisco

For the health and safety of all of our patients, visitors, and staff, the University of California, San Francisco (UCSF) is a smoke free environment. As a leader in health and medicine, our knowledge about the dangers of tobacco use has led us to the highest standard in maintaining a safe and healthy environment. Smoking is prohibited (not allowed) both indoors and outdoors on all University property.

Also, please be considerate of patients, staff, and visitors who have recently quit or are trying to stop smoking as exposure to smoke or smokers makes quitting even harder.

We are not asking you to quit smoking, only that you do NOT smoke on UCSF property. Please refer to the blue dashed line on the map above for boundaries.

Note: There are additional no-smoking areas off the main campus not shown on this map.

Thank you for your cooperation and for supporting a healthier environment for all.

## HELPFUL RESOURCES

Nicotine gum is available in the gift shop or nearby pharmacies.

UCSF Tobacco Education Center: (415) 885-7895
